11F., No. 8, Jiankang Rd., Zhonghe Dist., New Taipei City 235, Taiwan,Tel: 886-2-2225-3733Fax: 886-2-2225-4800E-mail: para@para.com.twwww.paralighttaiwan.com

DATA SHEET PART NO.: L-T69FGRBCT-1.5W-S2 REV: <u>A/2</u>

CUSTOMER'S APPROVAL : _____ DRAWING NO. : DS-31P-17-0068

DATE : 2021-01-28 PAGE

DCC:

1 of 9

Part No. : L-T69FGRBCT-1.5W-S2 REV: A/2

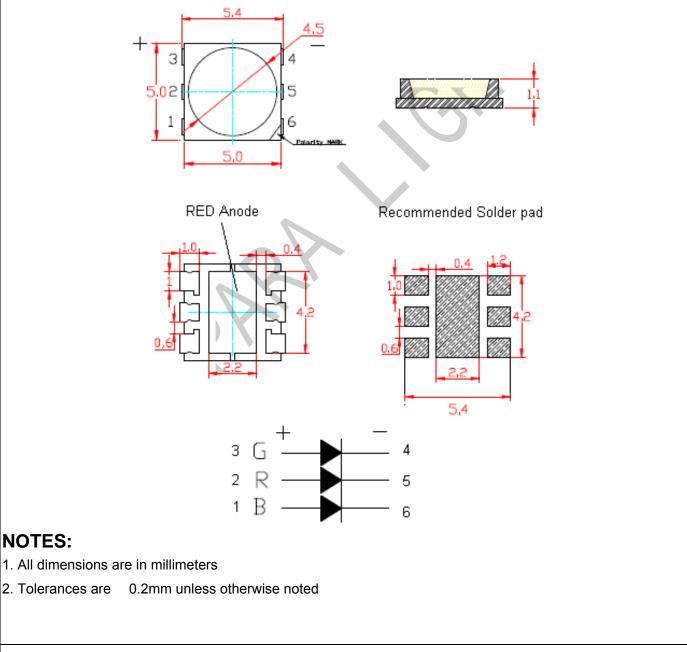

Mechanical Specification

5.00mm*5.30mm*1.10mm SMD LED

The materials of the LED dice is InGaN

Suitable for all SMT assembly and welding process

Package Outline

DRAWING NO. : DS-31P-17-0068

2 of 9

Part No. : L-T69FGRBCT-1.5W-S2

REV: A / 2

Absolute maximum ratings at Ta=25°C

Parameters	Symbol	Value	Unit
Power Dissipation	Pd	1500	mW
Forward Current	IF	150*3	mA
Pulse Forward Current	IFP	700	mA
Reverse Voltage	VR	5	V
Electrostatic Discharge	ESD	2000(HBM)	V
Operating Temperature	Topr	-40 ∼ +85 °C	°C
Storage Temperature	Tstg	-40 ∼ +100 °C	°C

Electro-optical characteristics at Ta= 25° C

Item	Syn	nbol	Mix	Тур	Max	Unit	Conditions
Forward voltage	1	G	3.0		3.2	V	IF=150*3mA
	VF	R	2.0		2.2		
		В	3.0		3.2		
Reverse current		R			5	μA	VR = 5V
Dominant wavelength	λd	G	525		530	nm	IF=150*3mA
		R	620		625		
		В	460		465		
Viewing angle	2 θ	1/2		120		Deg	IF=150*3mA
Luminous intensity		G	9000		10000		
	IV	R	5500		6500	mcd	IF=150*3mA
		В	2500		3500		
E: (Tolerance: lv ±10	%, λd±	2nm, ∖	′f ±0.05V)

Reflow profile

SMD Reflow Soldering Instructions

- 1. Reflow soldering should not be done more than two times
- 2. When soldering ,do not put stress on the LEDs during heating

Soldering iron

- 1. When hand soldering, keep the temperature of the iron under 300° C, and at that temperature keep the time under 3 sec.
- 2. The hand soldering should be done only a time

Rework

- 1. Customer must finish rework within 5 sec under 260 $^\circ\!\!\mathrm{C}$
- 2. The head of iron can not touch the LEDs
- 3. Twin-head type is preferred.

CAUTIONS

The encapsulated material of the LEDs is silicone. Therefore the LEDs have a soft surface on the top of package. The pressure to the top surface will be influence to the reliability of the LEDs. Precautions should be taken to avoid the strong pressure on the encapsulated part. So when using the picking up nozzle, the pressure on the silicone resin should be proper.

Part No. : L-T69FGRBCT-1.5W-S2 REV: A / 2

Storage :

* Before opening the package :

The LEDs should be kept at 30°C or less and 85%RH or less. When storing the LEDs, moisture proof packaging with absorbent material (silica gel) is recommended.

* After opening the package :

The LEDs should be kept at 30°C or less and 70%RH or less. The LEDs should be soldered within 168 hours (7 days) after opening the package. If unused LEDs remain, they should be stored in moisture proof packages, such as sealed containers with packages of moisture absorbent material (silica gel). It is also recommended to return the LEDs to the original moisture poof bag and to reseal the moisture proof bag again.

If the moisture absorbent material (silica gel) has faded away or the LEDs have exceeded the storage time, baking treatment should e performed using the following conditions. Baking treatment: more than 24hours at $65\pm5^{\circ}$ C.

* Please avoid rapid transitions in ambient temperature in high humidity environments where condensation may occur.
