

PARA LIGHT ELECTRONICS CO., LTD. 4F, No.1, Lane 93, Chien Yi Road, Chung Ho City, Taipei, Taiwan Tel: 886-2-2225-3733 Fax: 886-2-2225-4800 E-mail: para@para.com.tw http://www.para.com.tw

DATA SHEET

PART NO.: L-T670LBCT

| CUSTOMER'S APPROVAL : | DO | CC : | |
|----------------------------|-------------------|--------------|---------|
| ORAWING NO · DS-7A-07-0006 | DATE · 2020-08-31 | $P\Delta GF$ | 1 of 15 |

Part No.: L-T670LBCT REV: B/2

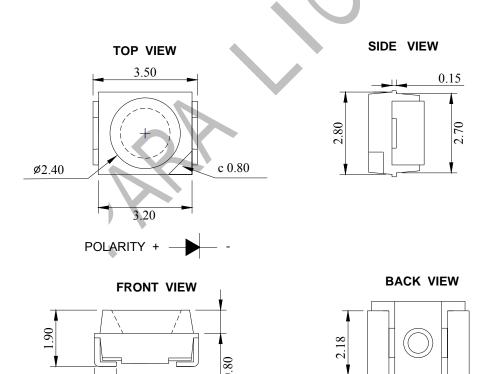

Features

- * Top view, Wide view angle, Blue color PLCC 2 package SMD LED.
- * EIA STD package, packing in 8mm tape on 7" diameter reels (ANSI/EIA-481-B-2001).
- * Compatible with automatic Pick & Place equipment.
- * Compatible with IR Reflow soldering and TTW soldering.
- * Pb free product and acceptable lead-free process.
- * Meet RoHS Green Product.

Application

- **★** Backlighting (Switches, keys, displays, illuminated advertising)
- * Emergency lighting / Signal and symbol luminaries.

Package Outline Dimensions

Notes:

- 1. All dimensions are in millimeters.
- 2. Tolerance is \pm 0.10mm (.004") unless otherwise noted.

CHIP MATERIALS

Dice Material : InGaNLight Color : Blue

* Lens Color: Water Clear

● Absolute Maximum Ratings(Ta=25°C)

| Symbol | Parameter | Rating | Unit | |
|--------|--|---------------------------------------|----------------------|--|
| PD | Power Dissipation | 75 | mW | |
| Inc | Peak Forward Current | 100 | A | |
| Ipf | (1/10 Duty Cycle, 0.1ms Pulse Width) | 100 | mA | |
| IF | Continuous Forward Current | 20 | mA | |
| VR | Reverse Voltage | 5 | V | |
| ESD | Electrostatic Discharge Threshold(HBM) ^{Note A} | 1000 | V | |
| Topr | Operating Temperature Range | - 40 ∼ + 100 | °C | |
| Tstg | Storage Temperature Range | - 40 ∼ + 100 | $^{\circ}\mathbb{C}$ | |
| T-1.1 | Soldering Tomperature (One times MAY) | Reflow Soldering:260°C (for 10second) | r 10seconds) | |
| Tsld | Soldering Temperature (One times MAX.) | Hand Soldering:300°C (for 3 seconds) | | |

Note A:

HBM : Human Body Model. Seller gives no other assurances regarding the ability of to withstand ESD.

• Electro-Optical Characteristics (Ta=25°C)

| Parameter | Symbol | Min. | Тур. | Max. | Unit | Test Condition |
|---------------------------------|---------|------|------|------|------|----------------|
| Luminous Intensity | IV | 350 | 480 | | mcd | IF=20mA |
| Viewing Angle | 2 θ 1/2 | | 120 | | Deg | |
| Peak Emission Wavelength | λр | | 465 | | nm | IF=20mA |
| Dominant Wavelength | λD | | 470 | | nm | IF=20mA |
| Spectrum Radiation Bandwidth | Δλ | | 25 | | nm | IF=20mA |
| Forward Voltage | VF | | 3.0 | 3.6 | V | IF = 20mA |
| Reverse Current | IR | | | 10 | μА | VR = 5V |

DRAWING NO.: DS-7A-07-0006 DATE: 2020-08-31 PAGE 3 of 15

Part No.: L-T670LBCT REV: B/2

Notes:

- 1. Luminous intensity is measured with a light sensor and filter combination that proximities the CIE eye-response curve.
- 2. θ 1/2 is the off-axis angle at which the luminous intensity is half the axial luminous intensity.
- 3. Caution in ESD:
 - Static Electricity and surge damages the LED. It is recommended use a wrist band or anti-electrostatic glove when handling the LED. All devices, equipment and machinery must be properly grounded.
- 4. Major standard testing equipment by "Instrument System" Model: CAS140B Compact Array Spectrometer and "KEITHLEY" Source Meter Model: 2400.

Notes: One reel in a bag, one bag in a inner box, ten inner boxes in a carton. Unit: mm.

Cleaning

- * If cleaning is required, use the following solutions for less than 1 minute and less than 40°C.
- * Appropriate chemicals: isopropyl alcohol. (When using other solvents, it should be confirmed beforehand whether the solvents will dissolve the package and the resin or not.)
- * Effect of ultrasonic cleaning on the LED resin body differs depending on such factors as ultrasonic power and the assembled condition. Before cleaning, a pre-test should be confirm whether any damage to the LEDS will occur.

CAUTIONS

1. Static Electricity:

* Static electricity or surge voltage damages the LEDs.

It is recommended that a wrist band or an anti-electrostatic glove be used when handling the LEDs.

* All devices, equipment and machinery must be properly grounded.

It is recommended that measures be taken against surge voltage to the equipment that mounts the LEDs.

- * When inspecting the final products in which LEDs were assembled, it is recommended to check whether the assembled LEDs are damaged by static electricity or not. It is easy to find static-damaged LEDs by a light-on test or a VF test at a lower current (blew 1mA is recommended).
- * Damaged LEDs will show some unusual characteristics such as the leak current remarkably increases, the forward voltage becomes lower, or the LEDs do not light at the low current.

Criteria: (VF>2.0V,at IF=0.5m A)

2. Storage:

* before opening the package:

The led should be kept at 30 c or less, 85 % RH or less. When the led is stored, a moisture proof packaging with absorbent material (silica gel) is recommended.

* after opening the package:

The led should be kept at 30 c or less, 70 % RH or less. After unpacking, the led welding is 168 hours (7 days). If the unused led indicator is still present, it should be stored in a moisture proof package, such as a sealed container with a moisture proof material (silica gel). It is also recommended to return the led to the original moisture proof bag, and to pack the moisture-proof bag again. If the moisture absorption material (silica gel) fades or the led exceeds the storage time (the unopened led is valid for 6 months), the following conditions should be used before baking.

Baking treatment: 65 °C, more than 24 hours.

avoid rapid changes in ambient temperature in a high humidity environment where condensation may occur.3.

3. Soldering:

Do not apply any stress to the LED lens during soldering while the LED is at high temperature. Recommended soldering condition.

* Reflow Soldering:

Pre-heat 120~150°C, 120sec. MAX., Peak temperature : 240°C Max. Soldering time : 10 sec Max.

* Soldering Iron: (Not recommended)

Temperature 350°C Max., Soldering time: 3 sec. Max. (one time only), power dissipation of iron: 20W Max. use SN60 solder of solder with silver content and don't to touch LED lens when soldering.

DRAWING NO.: DS-7A-07-0006 DATE: 2020-08-31 PAGE 12 of 15

Part No.: L-T670LBCT REV: B/2

4. Lead-Free Soldering

For Reflow Soldering:

1 · Pre-Heat Temp: 150-180℃,120sec.Max.

2 · Soldering Temp: Temperature Of Soldering Pot Over 240°C,40sec.Max.

3 ' Peak Temperature: $260\,^\circ\!\text{C}\,$ ' 10sec.

4 \ Reflow Repetition: 2 Times Max.

5 ` Suggest Solder Paste Formula : 93.3 Sn/3.1 Ag/3.1 Bi/0.5 Cu

For Soldering Iron (Not Recommended):

1 ` Iron Tip Temp: 350°C Max.

2 Soldering Iron: 30w Max.

3 \ Soldering Time: 3 Sec. Max. One Time.

5. Drive Method

Circuit model B

- (A)Recommended circuit.
- (B)The difference of brightness between LED's could be found due to the Vf-If characteristics of LED.

6. Reliability

1. Criteria For Judging The Damage

| Item Symbol | Cyrob al | Test Conditions | Criteria for Judgement | | |
